

# CRAFT

## 3D Pumpkins

### What you need:

- Orange card
- Scissors
- Hole punch
- Split pins (Butterfly pins)
- Green pipe cleaners
- Brown pom-pom

### Instructions:

1. Start by cutting your orange card into even long strips that are all roughly the same width and length.
2. Punch a hole into both ends of the strips of card.
3. Line up all the strips and in on one end use a split pin to secure one end of all the strips together.
4. Fan out the strips of card to make a circle and one at a time bring the circles up to the centre to create what looks like a ball and line up the holes in the strips and then secure with another split pin.
5. Move the strips round so they are all evenly spaced out.
6. Glue the green pom poms and pipe cleaners on top of the ball and draw a face onto the pumpkin. Then you could explain that Jesus is the light of the world and we can use pumpkins as a symbol for being a Christian and how Jesus' light is in us and shines out for the world to see.
